

Kestrel Logistics - operations review, Q1 2026

Kestrel Logistics is headquartered in Rotterdam and operates eleven depots across the Netherlands, Portugal and Spain.

Ember pilot results: over twelve weeks at the Lisbon depot, the on-time delivery rate rose from 87 percent to 93 percent, and fuel cost per stop fell by 6 percent. Morning planning time for dispatchers fell from two hours to 25 minutes.

Decisions

Ember will be rolled out to the Porto and Rotterdam depots in Q2 2026. Samuel Okafor will lead the rollout, and Alice Moreno moves to the redesign of the drivers' mobile app.

Budget: the rollout is funded from the operations technology budget with no new headcount.
